

## INSTRUCTION TO AUTHORS

**AGRIVITA**, Journal of Agricultural Science, is the normal channel for publication of papers in plant sciences, agronomy, horticultural, plant breeding, soil-plant sciences and pest or disease-plant sciences. Manuscripts reporting experimentation or research in field crops will be accepted for review as papers.

### **Guiding Principles**

An acceptable manuscript will meet the following general criteria : it reports a worthwhile contribution to science, sound methodology was used and is explained with sufficient detail so that other capable scientists could repeat the experiments, conclusions are supported by data, manuscripts is concise, well written, and understandable.

### **Manuscript Format**

Manuscript should given in soft copy and arranged in Agrivita standard format, Title, Authors, Address and Email, Abstract, Key Words, Introduction, Material and Methods, Result and Discussion, Conclusion and Suggestion, Acknowledgment and References. Typed at one side of white paper of A4 size, in single column, double space, 10 point arial font and should given line numbers.

### **Manuscript Title**

Title, consist of not more than 20 words. It should be written clearly and concisely describing the contents of the research.

### **Authors**

Manuscript has main author and co authors. Full name author and co-authors, include address and email must be stated clearly.

### **Abstract**

State the objective is specific and clearly, as to what is to be obtained. Give a brief account of the methods. Identify scientific names of plants, other organisms, and chemicals. State results succinctly. State conclusions or recommendations and link this to the significance of the work. Abstract should not more than 200 characters which has no reference and accompanied keywords. Abstract must be integrated and independent which is consist of introduction and purpose, methods, results, conclusion and suggestion.

### **Introduction**

Presented briefly and clearly information concerning background, aim and purpose of the research.

### **Materials and Methods**

It should mention time and place of research in first part. All materials and methods that used such chemical for analysis, treatment and experimental design must be stated clearly and briefly.

### **Results and Discussion**

Result and discussion be written in same part. They should be presented continuously start from main result until supporting results and equipped with a discussion. Unit of measurement used should follow the prevailing international system.

### **Conclusions and Suggestion**

Conclusion should be explained clearly. Suggestion placed after conclusion contains a recommendation on the research done or an input that can be used directly by consumer.

### **Acknowledgements**

State the grant source and the person to whom the grant was given. Name the person to help you work

### **Reference**

The author–year notation system is required and completed. All reference that mentioned should be written down in reference and arranged from oldest to newest and from A to Z. Articles have 10 recent references or over and 60% is journal. The most of references are primary ones.
